

Healthcare Agencies: Integrate Systems & Reporting

**Fully Integrated
Financial and Clinical Software
From a Name You Can Trust -
Microsoft!**

Your agency requires specialized healthcare software that will increase efficiency and empower your team so you can provide the highest level of service and care.

But strong clinical and patient systems are often weak financial systems.

Now you can have the best of both in one integrated system from Microsoft.

**Get A Complete Financial & Clinical Solution
From Microsoft
or Integrate a Microsoft Financial System
With Your Existing Clinical System
such as Misys or McKesson.**

You get solid accounting software from a name you can trust. Plus, it works with the other Microsoft programs you use every day, so it is easy to learn and easy to use.

"We use Great Plains for our General Ledger, Accounts Payable and Accounts Receivable. I feel Great Plains helps us run our business more efficiently. I had used Great Plains in the past and found it easy to learn and easy to use, but it is nice to know that CAL is there for support if we need it."

Wendy Saben, Senior Bookkeeper, Farmington Valley VNA

"The Great Plains system meets all of our needs. Because it integrates smoothly with our other systems we see significant time savings in running payroll. I can easily generate reports inside Great Plains and because it is a Microsoft system I can easily export information into Excel and use the data any way I want. I have the information I need to make important decisions, quickly."

Cynthia Florou, Finance Director, New England Home Care.

"My favorite thing about using Great Plains is the ability to do repetitive journal entries, which eliminates double entry. This one feature alone saves time for my entire team and makes month end closing a breeze. The support team at CAL is knowledgeable and I enjoy working with them."

Judy Hardwick, Director of Finance, VNA Health at Home

"The great thing about Microsoft Dynamics GP for healthcare providers is that it allows you to use powerful software without being afraid of it. Microsoft Dynamics GP is very easy to learn and understand. The reporting comes out clear cut. The way you get information out of it is clear. And the people who help you install the product are there to hold your hand if you need assistance."

Michelle Charette, Billing/IT/Security Supervisor, The Greater Bristol VNA

About CAL Business Solutions
