

Advanced SmartList

Gain a greater capacity to analyze financial data and improve your business intelligence

Encore
Business Solutions

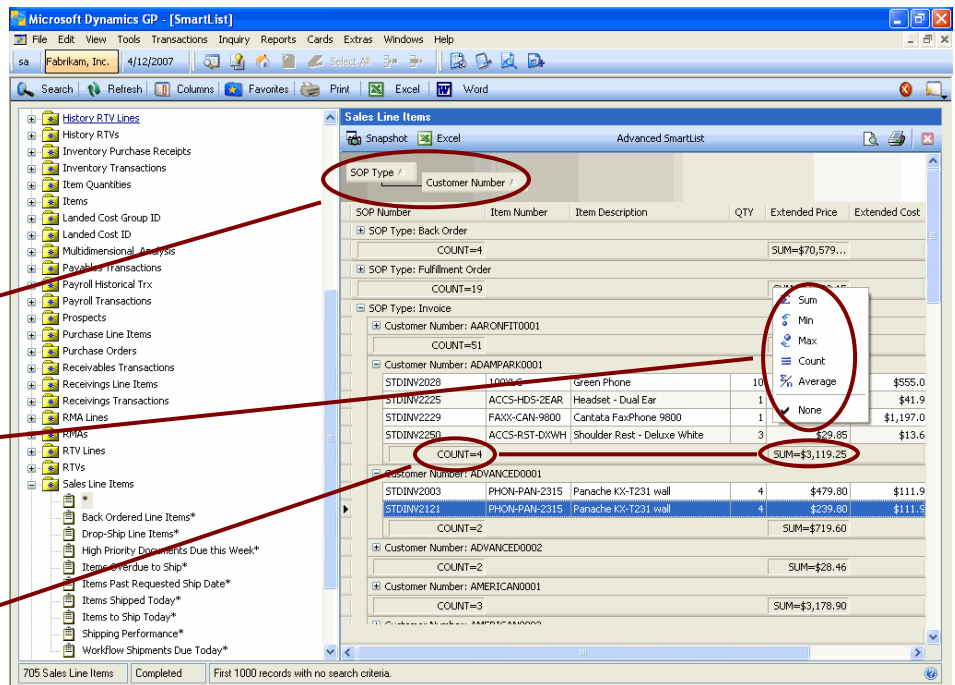

Suitable for all Microsoft Dynamics® GP users, *Advanced SmartList* is a seamless extension to SmartList Favorites, a Microsoft Dynamics GP query tool. Adding power to your existing SmartList application this quality and cost-effective tool will help you save time, effort and costs.

- Create advanced custom queries on the fly.
- Sum groups of information quickly.
- Sort, filter and re-order columns effortlessly.

Access pertinent information quickly

Create advanced queries on demand for easier, faster access to the information stored in the Microsoft Dynamics GP system.

- Drag column headers here to group by columns and define subtotals.
- Within the grid row each column has pop-up menu options including Sum, Min, Max, Count, Average or None (removes any of the above filters).
- Advanced SmartList features include Grouping, Sorting, Filtering, along with the ability to Sum data by column. Right click to add totals in the familiar interface of SmartList with ease.

Reduce reliance on others to generate custom queries

Save time and eliminate the need to rely on a technical resource or learning how to use Crystal Reports for report development by using the already familiar SmartList interface to produce custom queries.

Save time and effort.

Sum columns and insert totals in the query reducing the need to export results to Excel for simple calculations.

Advanced SmartList

Create reports in a preferred format.

Manipulate and massage data with the flexible grid control component to produce detailed custom lists and reports in a preferred format using functionality such as:

- Sorting on multiple fields.
- Filtering by field or column.
- Grouping transactional data.
- Add functions and totals to groups.
- Snapshots for side-by-side comparison and analysis.
