Custom Functions

Create Custom
Reports on the Fly

BizNet Content Architect makes you the architect, designer, and developer. An innovative complement to the BizNet Content 'Best-of-Breed' pre-built library, Content Architect gives you the power to design your own functions, create custom fields, and slice and dice your data any way you need it. With BizNet Content Architect, your data can be fully customized for your needs, all within Excel.

3-Step Approach:

1 Connect

- Real Time Connections to Any of Your Data
- Design Custom Functions and Analysis Sets in Minutes
- Leverage Existing SQL Queries

2 Analyze

- 100% Excel Interface
- Slice and Dice Your Data Utilizing Familiar Excel Functionality (Pivot Tables, List)
- Drag and Drop User Environment

3 Take Action

- Distribute Key Information to Key People When They Need It
- Meet Any Reporting Need You Have
- Deliver a Complete and Custom Ad-Hoc Reporting Solution

BizNetContent Architect™

Get The Data You Need in the Format You Want With the Skills You Already Have.

100% Excel Compatible

BizNet Content Architect makes it easy for users to produce their own unique functions.

- Utilize Existing SQL Queries
- Use a Single, Powerful Reporting Tool to Combine Excel and Real Time Connectivity
- Test and Error-Check Capabilities at Each Stage of the Creation Process

Database Name	ERP	Authentication (SQL, Windows)
Server Name	SQL-Ops	User Id
DataSource Name	MTDOPS	Password
DataSet Creation List		
DataSet Name	Required Input Parameters	SQL Query
MTDNETExpanded	Company Fiscal Year, Fiscal Period	SELECT

Create Custom Functions and Analysis Sets

BizNet Content Architect provides functions that understand your data.

- Create Custom Drag & Drop Functions and Analysis Sets in Minutes
- Create User Friendly Function Names And Analysis Sets
- Add Custom Cell-Based Parameters to Filter Your Data

MetaData Node Order	Level 4	Level 5
Functions	MTNDET Summary	
Analysis Sets	MTNDET Details	
Analysis Set DataSet Name	Node Display Name	Type Of Set (Both, List, Pivot)
MTNDETExpanded	Fiscal Period Pivot	Pivot
MTNDETExpanded	Fiscal Period Details	List
Template Name	Node Display Name	
Income Statement.XLTX	Income Statement Template	
Pivot Layout	Property Value	Security Group
Property Version	Values, Segment1, Segment2, Sum of BegBalance	Everyone

Direct Link to Your Business Data

BizNet Content Architect directly integrates your business data with Excel, removing the need for a data warehouse.

- Provides End Users with the Assurance Data is Current and Accurate
- No Longer a Need for Giant Spreadsheets With Enormous Tables of Queried Copied and Pasted Data
- Leverage BizNet's In-Memory Engine to Scale to Millions of Records
