

CONTAINER MANAGEMENT

Container Management allows distributors complete visibility to all imported items from time of purchase, while in-transit, through actual receiving - all added to your Microsoft Dynamics® GP Purchase Order Processing system.

FUNCTION

Container Management adds functionality for importers, including manifest entry and vessel tracking, providing you with all the tools you need to track the purchase and receipt of imported inventory items.

IMPACT

With Container Management, you can maximize your investment in your Microsoft Dynamics GP system by streamlining the entry of container manifests and processing the receipt of all container items in a single window. This allows you to have complete information about purchased items.

FEATURES

- Complete manifest entry and tracking, including in-transit tracking of containers and their contents
- Allows receiving of all container items in a single step
- Freight-on-board (FOB) receiving of goods before they arrive at your loading dock
- Landed cost apportionment by cube for individual PO receipts
- Allows drop-ship manifests for containers imported directly to customers
- Support for multiple bins
- Container optimization by volume and weight
- Support for lot and serial numbered items

BENEFITS

- Provides customer service with visibility to item status
- Streamlines the receiving process
- Provides complete visibility along your supply chain
- Reduces paperwork on the receiving dock

The screenshot shows the 'Manifest Entry' window in Microsoft Dynamics GP. It displays manifest information for Manifest Number MANIF0001, Container CONTAINER25874, and Forwarder ID ADVANCED0001. The status is 'Manifested' and the expected ship date is 3/1/2011. The interface includes a table for PO Number P01004 with columns for Item, QTY Base U/M, QTY Unreceived, QTY Unassigned, QTY Expected, and QTY Ordered. The table lists items like HDWR-SWM-0100 and HDWR-SRG-0001. A 'Landed Cost' section at the bottom shows a total of 27.00 units and 0.00 cost.
