

A collection of tools
that improve the
Microsoft Dynamics
GP experience.

Work Simpler & Easier

Dynamics GP Toolbox ~ List of Tools

Security ~ tools that make the system more secure.

Password Policy Options	Provides password restrictions to both user password and the system password, above and beyond those provided by Microsoft Dynamics GP.
Inactivity Timeout	Allows a workstation to be gracefully logged out of Microsoft Dynamics GP after a pre-defined period of inactivity.
User Lockout	Lock users out of Microsoft Dynamics GP after they have made three unsuccessful password attempts.
Safe Login	Prevents users from doing anything immediately after logging into Microsoft Dynamics GP until all products have completely initialized.
Redirect	Allows you to assign a different window to open when a user does not have security access to a given window.

Administration ~ tools that help the System Administrator.

Version Pro	Control 3rd party products across your Microsoft Dynamics GP enterprise by ensuring all servers and workstations have the correct products installed.
Login Logging	Track actual logins against the Microsoft Dynamics GP registered user count.
System Maintenance Lockout	Allows a system administrator to prevent users logging into a specified company or all companies.
Conditional Field Level Security	Add conditional Dexterity scripting to fields, allowing simple customization of Microsoft Dynamics GP.

Business Processes ~ tools that improve specific modules.

Reason For Hold	Forces the user to enter the reason that they are putting a customer or vendor on hold.
DocSync	Allows you to retain all or part of a transferred Sales document ID in the resulting document ID.
Period Open/ Close	Open, close, and create fiscal periods across all companies from one screen.
Reset Batches	Reset batches stuck in a failed posting process.
Payment Approval	Require tiered approvals on all payments before they can process.
Modify MDA	Modify MDA codes against historical posted transactions.

User Experience ~ tools that make the GP experience simpler & easier.

Mentor	Search for, open, and get information about windows in Microsoft Dynamics GP.
Inspector	Gives detailed technical information about the fields in any window in Microsoft Dynamics GP or any Dexterity-based product.
Auto Login	Automatically remembers the last user ID, password and company on the login windows, for Microsoft Dynamics GP Version 10.
PopUps	Display information and/or Tips of the Day to the user on virtually any window in Microsoft Dynamics GP.
Widgets	<ul style="list-style-type: none"> • Close confirmation: A dialog box confirms you wish to close Microsoft Dynamics GP, saving time from exiting and restarting the application by accident. • Company in title bar: Adds the company name to the application so you can find which company instance of GP you want from the Windows task bar.
