

InfinityHR Acumatica Integration

InfinityHR has created an integration with Acumatica (version 5.2), which allows a single point of entry for employee data to be updated in real-time. Our seamless integration is easy to use and makes it convenient to manage employee data without the need for duplicate data entry.

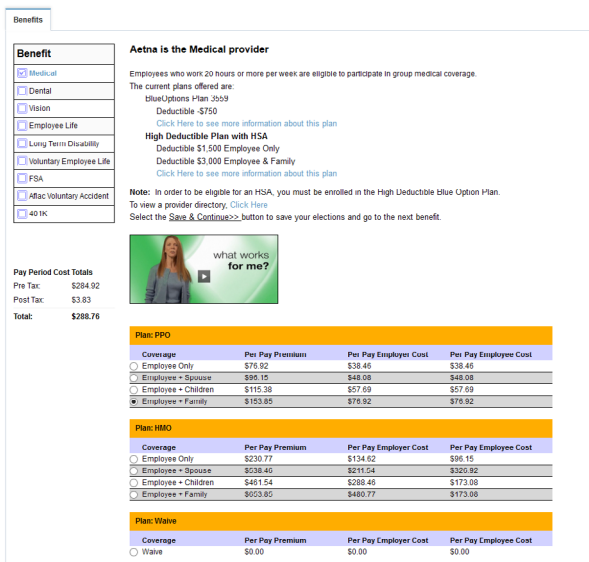

The integration includes the following features:

- System utilities to load company level fields from Acumatica into the InfinityHR application. These fields allow for a quick and accurate means of implementing your clients on the InfinityHR application.
- System utilities to load employee level fields from Acumatica in to the InfinityHR application
- Once the integration is established between InfinityHR and Acumatica, data is pushed back in real time to the Acumatica platform and updates new hires, changes in demographics and terminations

Load Company Data Screen

- This integration will allow Acumatica users access to InfinityHR's core HR functions and modules, which include:
 - Applicant Tracking
 - Benefit Management
 - Employee Self-Service Portal
 - Payroll
 - Performance Management
 - Surveys
 - Time & Attendance
 - Time Off Tracking
 - Wellness Campaigns
 - Workflow Management
