

Business Solutions for Maximum Performance

The Right Information

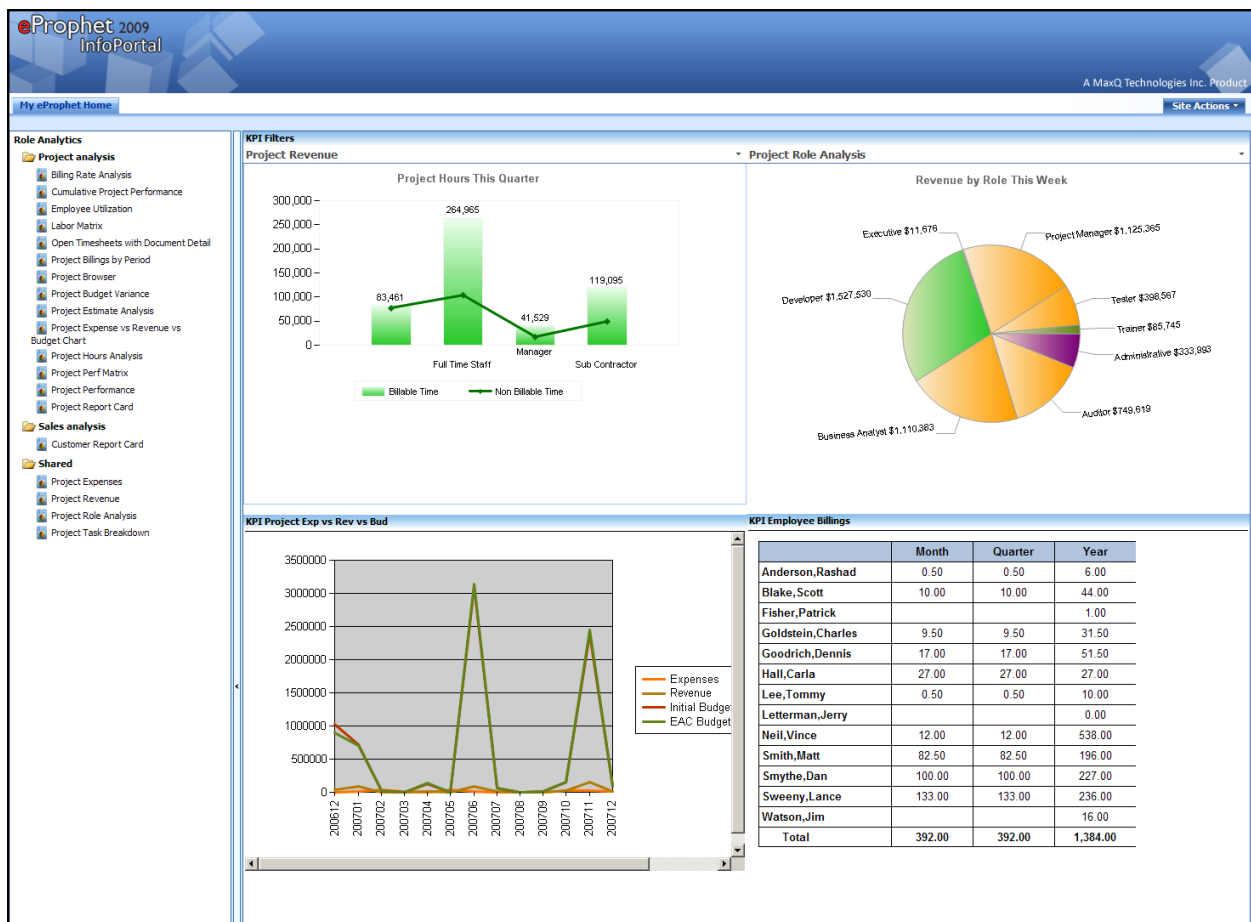

At The Right Time

From the backroom to the boardroom, eProphet helps every user get the right information at the right time and in a format that's right for them. The result is people empowerment across your entire business from a solution that's easy to learn and use.

eProphet

MaxQ's eProphet solution leverages Business Intelligence (BI) functionality, making it easier for you to get the specific information you need, for better decision making. More than just a BI tool, eProphet is an enterprise wide solution. It delivers information consolidation, data transparency, and the piece of mind that comes from knowing your data is accurate and timely. Unlike other solutions, eProphet addresses the needs of every job function within your organization. From the backroom to the boardroom, eProphet helps every user get the right information at the right time and in a format that's right for them. The result is people empowerment across your entire business from a solution that's easy to learn and use.

Analytics and KPIs are delivered via the web for zero touch deployment to all users

Benefits

Monitor the Health of Your Organization

Making sound decisions that affect the bottom line shouldn't be challenging. But with data arriving from a variety of companies, sources and formats it often can be. eProphet's web enabled dashboards surface Key Performance Indicators to help you monitor the pulse of every aspect within your business, so you can make decisions quickly and decisively.

Analyze Information @ Your Fingertips– Just a Click Away!

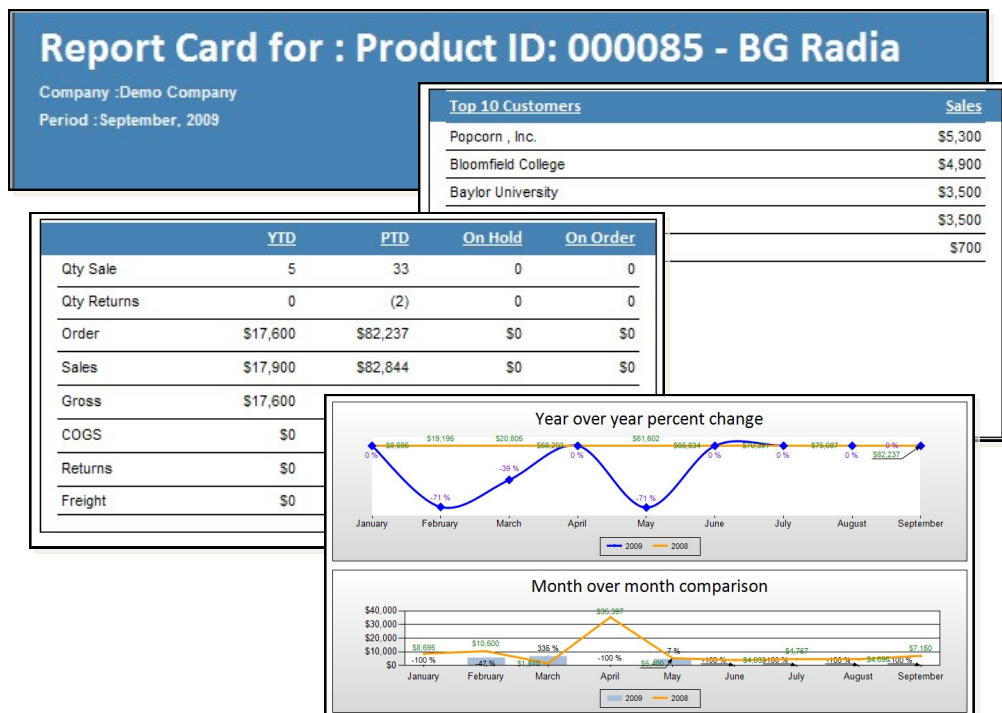

With dozens of preconfigured analytics, eProphet gives users the ability to analyze business data in infinite ways with zero programming effort. Managed security and flexible reporting output ensures that your intended audience retrieves only the information they need.

Manage Data Your Way

The modular suite is scalable to suit specific industry needs even when those data sources are from different ERP sources. Information consolidation eliminates data silos and with full data transparency, data is easy to access, easy to work with and presented in clear business terminology.

View Data in Formats You Choose

With no "black box" data can be explored with most leading analytic clients including Microsoft Excel. Users can also deliver reports, KPIs and data models in output formats like web browser based HTML, PDF, Excel, XML and any OLAP viewer.

Key Features

Benefits

Alert Subscriptions

Get reports delivered to you automatically when a predefined condition occurs in the database. So if you need to know when an item falls below its reorder level, eProphet will send an alert report to ensure the right person knows it should be restocked.

KPI Assistant

Deliver Key Performance Indicators via KPI web parts with Global filters. Since the web parts work together, if a user changes the date in one web part it is automatically updated in another!

OLAP Report Builder

Enable users to build OLAP reports and queries quickly and easily.

Role Based Security

Need to set up security for Executives, CFOs, Sales Managers or Project Managers? eProphet offers role based security, menus and data level security.

Dynamic Report Columns

In addition to dynamic filters and groupings, columns on a report are dynamic (FRx like) - making it easy to change report parameters on the fly!

Multi-Currency and Multi-Language Support

Innovative support for multi-currency allows users to report across the entire enterprise regardless of the base currency of the source database. Users can also

Tight Integration

eProphet is completely built using Microsoft technologies and supports SQL 2008. Integrations supported include Microsoft Dynamics SL, Microsoft Dynamics GP, Microsoft Dynamics AX, Microsoft Reporting Services, Microsoft SharePoint and DBC accessible ERPs.

Power Drills Tool

Enable users to conduct interactive reporting & analysis with efficient drill down

Business Portal

Share information and increase collaboration across your entire organization. eProphet has the ability to embed in any existing business portal including Microsoft SharePoint.

Wizards and Web Parts

Core database functions, extractions and analytics customizations can be done entirely from a web interface. Wizards ensure that IT resource requirements are low for zero-touch deployment. For most users, only a web browser is required!

Meta Base

Labels that describe the unique traits of your business are a snap to configure and since everything is controlled by the meta base you know that all the data in all reports is consistent and reliable.

MaxQ's eProphet — Project Analysis module leverages Business Intelligence (BI) functionality to make it simpler for you to use the software as your single source of information for project activity, analysis and reporting. Designed to make your entire project management team more efficient and informed, the Project Analysis module comes equipped with prebuilt reports for immediate reporting, the Power Drills tool for analysis of profitability by project and task and built-in integration with Microsoft solutions. eProphet—Project Analysis can help you analyze and generate reports quickly and easily for all your projects, across your entire company, from all angles and all sources, including archival data you may have thought was inaccessible. Your entire team will be able to determine which projects are over budget and why, analyze inventory and vendor utilization across projects and identify possible inefficiencies in existing processes.

MaxQ eProphet—Project Analysis is a complete solution to help your project and operations managers support project and service based work.

Benefits

Saves Time & Money by helping you complete projects on time and within budget each month. With full visibility into all project related metrics, you can analyze employees' activities, compare how you're doing against budget and more.

Integrates Seamlessly with existing ERP systems like Microsoft Dynamics SL and Microsoft Dynamics GP so your ERP data will be loaded without any hassles. You can also embed eProphet into your company's enterprise information portal and other project series applications for centralization of all project activity.

Increases Efficiency since it's easy to learn, implement, support and use. Allows Estimated Actual at Completion (EAC), Forecast at Completion (FAC) and Budget comparisons. If you use Microsoft Dynamics Project and Order Management modules, you can analyze any sales or project activity across both.

Lowers Total Cost of Ownership by allowing each member of your project management team to keep using existing software that is familiar to them including Microsoft Office, SharePoint, Microsoft Dynamics SL, Microsoft Dynamics GP and other Open Database Connectivity (ODBC) accessible ERPs.

Supports a Wide Range of Information Explorers by delivering reports, KPIs and data models in output formats like web browser based HTML, PDF, Excel, XML or any OLAP viewer.

The Power Drills Tool provides interactive reporting & analysis by allowing you to drill down and change parameters easily

Features / Functionality

- Enables the use of pivot tables for what if scenarios, data modeling, and ad hoc analysis and reporting on any project data.
- Allows you to perform analysis across multiple branches and/or subsidiaries; eliminating any existing software's single company setup constraints.
- Provides access to a central repository of information, regardless of data being housed in multiple databases, so your project and operations managers can monitor the pulse of each project's profitability and identify possible process bottlenecks.
- Standard prebuilt reports which provide immediate access to project details for one or more projects by task, customer employee, account categories and time.
- Complete access to archived project data allowing you to see how your projects perform over the long term for easier historical analysis.
- Ability to embed with other applications like Microsoft Dynamics SL and Microsoft Dynamics GP.
- The Power Drills Tool provides interactive reporting & analysis by allowing you to drill down and change parameters easily, hence reducing the size of your report library.
- The Scheduler Tool allows you to schedule report generation and delivery to any member of your team via email or as a link to an information portal like Microsoft SharePoint.
- eProphet's Metadata Design allows you to centralize your business and industry terminology so your reports are meaningful to your business.
