

InterCompany Postings for Microsoft Dynamics GP

Nolan Business Solutions' InterCompany Postings (ICP) solution simplifies the intercompany process, reduces errors and saves countless hours of manual entries and reconciliations. Users are able to quickly and easily post transactions between different companies and different accounts with Microsoft Dynamics GP.

You'll never again have to worry that an offsetting batch was deleted. With Nolan's InterCompany Postings, the transaction is automatically carried through where needed.

The Benefits

- ✓ Initiate transactions from any GP module with the Trigger method
- ✓ Specify destination accounts with the Alternate Method
- ✓ Transfer cash, including GP Checkbook ID, between GP companies
- ✓ Superior drill-back capability
- ✓ Automatically post and void transactions between GP companies
- ✓ Supports multi-currency

Technical Information: InterCompany Postings for Dynamics GP

Nolan Business Solutions' InterCompany Postings simplifies the intercompany process, reduces errors and saves time

Supported InterCompany Transactions

By simplifying the transaction process between your related companies you gain more time to focus on customers.

As an out of the box solution, InterCompany Postings will start improving your purchase process as soon as it is integrated into your Dynamics GP system. The setup process is extremely simple and straightforward and users will be surprised at how easy it is to use, as the interface fits seamlessly into Dynamics GP.

Enabling you to post from any Dynamics GP module, you'll be able to create transactions that are immediately visible and updated within your destination account. After instantly updating the two accounts, you have access to the full report and audit trail, giving you greater control and visibility over your related companies.

If the post was incorrect, the authorizer can be immediately void the transaction and both GP accounts are automatically corrected. This means any errors are easily remedied, and the audit trail will remain correct. Often reversing processes is a frustrating process within GP. InterCompany Postings makes it quick to fix mistakes.

InterCompany Postings supports multiple account types and enables you to post to different companies based on your pre-existing parameters. Therefore it is less of a headache for larger companies making postings to multiple sites and databases, to create transactions and update multiple systems.

With multi-currency, multi-company support, and multi-account type, InterCompany Postings provides a powerful and flexible tool for instant transaction posting.
