

Restricted Party Screening Solution for Microsoft Dynamics GP

Complying with U.S. export laws is becoming more and more difficult for companies, and the penalties for non-compliance are severe. There are many different regulations and federal agencies involved depending on the type of export, which makes it a challenge to comply with U.S. export controls.

The **Restricted Party Screening Solution** from Sherwood Systems automatically screens records in Microsoft Dynamics GP against various restricted party lists from government agencies, and alerts of potential non-compliance. Working seamlessly with **eCustoms Visual Compliance** web application, contact information is sent and the results of the search are returned, without the user leaving Microsoft Dynamics GP.

- ♦ Automatically screens customers, vendors, sales and purchase documents as they are added in Microsoft Dynamics GP
- ♦ If company name, contact name, address or country is found on a restricted party list, the record is placed on hold and assigned an alert level
- ♦ Alert level Red indicates a match was found on two of the possible four search criteria. A Yellow alert means a match was found on the company name or contact name, or the country is on the Risk Country list

Type	Customer	Sales-Transaction	Company Name	Screen Level
Contact Name	Address			
City		State	Zip	Country
CUST	MIDEAST		Mideast Enterprises	Yellow
SOP		ORDST2332	Cirrus Electronics	Red
CUST	AVIATION		Aviation Services	Red
SOP		QTEST1029	Cirrus Electronics	Yellow
SOP		STDINV2515	Cirrus Electronics	Yellow
CUST	CIRRUS		Cirrus Electronics	Red
SOP		ORDST2335	Aviation Services	Red

- ♦ A status screen displays the records with the alert level and a drill-back to the results of the search - the same results that appear on the Visual Compliance website
- ♦ The user determines if the record should be released and processing allowed to continue on the sales or purchasing documents

Restricted Party Screening Solution for Microsoft Dynamics GP

System Requirements

Microsoft Dynamics GP (formerly Microsoft Business Solutions-Great Plains):
Versions 9.0, 10.0 or 2010
