

# SOP TO BOM LINK

*SOP to BOM Link provides the ability to associate Sales Order line items with Assembly transactions in your Microsoft Dynamics® GP system.*

## FUNCTION

*SOP to BOM Link* associates sales documents and assembly orders. Assembly orders can be generated from within Sales Order Entry or you can associate existing assembly orders with a sales document. When an assembly transaction is posted, the associated sales order lines are allocated and fulfilled, streamlining the entire order to shipment process.

## IMPACT

*SOP to BOM Link* eases the process associated with assembling items for specific orders. With this solution Microsoft Dynamics GP automatically allocates assembled items to the backordered sales orders.

## FEATURES

- Assembly transactions can be created from backordered sales lines
- Existing assembly transactions can be associated with a sales document line either manually or automatically
- Order associations can be created or deleted from either the Assembly Entry window or SOP Entry windows
- Backordered Assembly Items Report displays all orders that are awaiting the item on the assembly transaction

## BENEFITS

- Supports an “Assemble to Order” environment using standard Microsoft Dynamics GP transactions
- Streamlines data entry by creating assembly transactions automatically
- Provides better tracking information regarding production commitments
