

SALES CONFIGURATOR

Sales Configurator provides a complete “assemble to order” sales system to streamline the Microsoft Dynamics® GP order entry process.

FUNCTION

Sales Configurator allows you to create and sell customer-specific configurations. Configurations can be placed on sales order documents as SOP kit lines, individual sales order lines, or can be designated as an “assemble to order” configuration. Assemble to order configurations are assembled using the BOM module prior to shipment.

IMPACT

With *Sales Configurator*, you can set up configuration item choices and define business rules to ensure orders are built correctly during the order entry process. A graphical representation of the product structure, available options, and selected options is displayed during order entry.

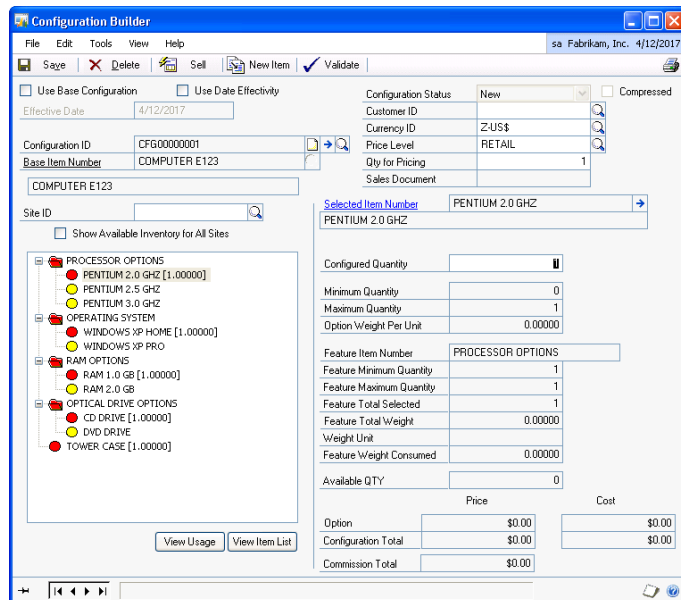

FEATURES

- Automatic pricing calculation based on configuration choices
- Configuration rules ensure properly configured products are sold
- Uses the BOM module to define configurable product structures and configuration rules
- Multiple configuration levels up to ten levels deep
- Retains “as built” configurations for support purposes

BENEFITS

- Streamlines the order entry process for customer-configured items in “assemble to order” environments
- Reduces data entry required for option configuration and kit line modification

Contact your Microsoft Business Solutions™ reseller and discover how *Sales Configurator* can work for your organization.

EXPAND THE BENEFITS AND CAPABILITIES OF MICROSOFT DYNAMICS GP

A PROVEN AND TRUSTED SOURCE Since 1994, we have developed a wide range of products from time-saving enhancements to robust, feature-rich modules to meet the needs of users. The result is a rich history of partner and customer success.

DISTRIBUTION, ACCOUNTING, AND WAREHOUSE INTEGRATION EXPERTISE

We understand the supply chain and accounting challenges facing organizations. This expertise helps us create innovative products that introduce new business processes into Microsoft Dynamics GP. The result is an accurate, streamlined workflow that integrates critical information with your business management solution.

SEAMLESS INTEGRATION WITH MICROSOFT DYNAMICS GP Our products are created using the Dexterity® development environment to ensure seamless compatibility with Microsoft Dynamics GP. The result is a common look and feel and an easy upgrade path.
