

SERIAL NUMBER EDIT

Serial Number Edit provides the user with the capability to enter serial numbers for drop ship items on unposted and posted SOP invoices, and edit serial numbers for any item on posted invoices.

FUNCTION

Serial Number Edit enhances the serial number tracking capability of Microsoft Dynamics® GP. Standard functionality limits the tracking of serial numbers for items sold from in-stock inventory only. *Serial Number Edit* extends this functionality to include drop ship items, and allows editing of serial numbers for all items sold or in stock.

IMPACT

With *Serial Number Edit*, you can enter the serial numbers of drop ship items before or after you process an invoice. Serial numbers on drop-ship POs linked to sales documents automatically update the corresponding items. And correcting serial numbers for in stock items is a simple, reliable process.

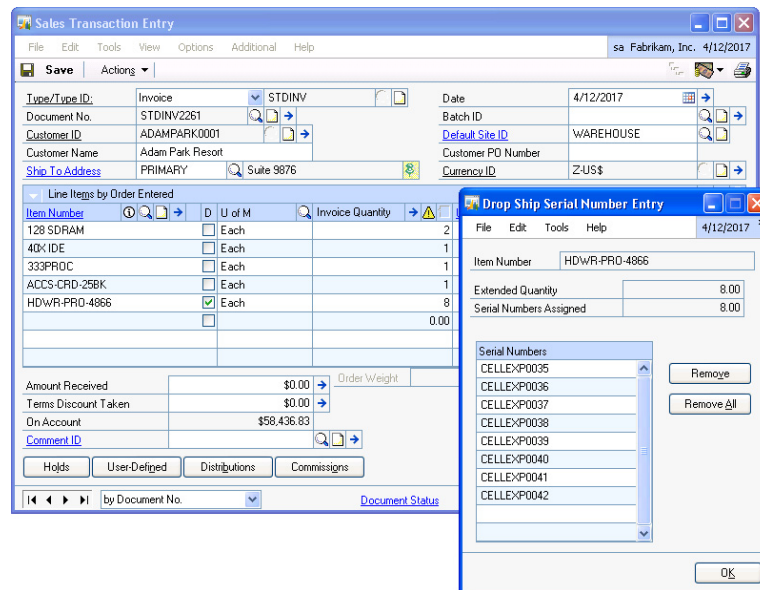

FEATURES

- Easily enter/edit serial numbers for:
 - Drop ship items on posted invoices
 - Drop ship items on unposted invoices
 - Items on drop ship POs
 - Items currently in inventory
- Enter serial numbers on customer invoices, regardless of whether the items are drop ship items

BENEFITS

- Save time by posting invoices with temporary serial numbers
- Ensure the accuracy of your inventory by correcting serial number errors

Contact your Microsoft Business Solutions™ reseller and discover how *Serial Number Edit* can work for your organization.

EXPAND THE BENEFITS AND CAPABILITIES OF MICROSOFT DYNAMICS GP

A PROVEN AND TRUSTED SOURCE Since 1994, we have developed a wide range of products from time-saving enhancements to robust, feature-rich modules to meet the needs of users. The result is a rich history of partner and customer success.

DISTRIBUTION, ACCOUNTING, AND WAREHOUSE INTEGRATION EXPERTISE

We understand the supply chain and accounting challenges facing organizations. This expertise helps us create innovative products that introduce new business processes into Microsoft Dynamics GP. The result is an accurate, streamlined workflow that integrates critical information with your business management solution.

SEAMLESS INTEGRATION WITH MICROSOFT DYNAMICS GP Our products are created using the Dexterity® development environment to ensure seamless compatibility with Microsoft Dynamics GP. The result is a common look and feel and an easy upgrade path.
