Advanced B2B eCommerce

A true solution that gives you the best competitive advantages in this increasingly global market.

Microsoft Dynamics

Businesses today need an eCommerce solution that includes online customer self-service capabilities as well as a quick and easy order entry solution. k-eCommerce B2B is directly integrated into Microsoft Dynamics® and provides an easy-to-use shopping environment with streamlined checkout, reorder capabilities, order tracking, account payment and sales history features. With k-eCommerce B2B you also get real-time inventory, pricing and document history coupled with versatile product search and browsing.

K-eCommerce B2B puts all of this and more at your customer's fingertips with access 24/7/365.

Online self service capabilities

Each customer has their own personal and secure online account with access to an array of services that make their shopping experience quick and easy. From the online environment, customers can:

- View pricing and inventory information
- Place an order by browsing, searching or reordering from frequently ordered products
- Schedule regular orders to automatically reoccur based on your set criteria.
- Track order status and view tracking information
- View/reprint payments, statements and sales order history
- Access a secure online bill pay portal to view, print and pay open invoices

Unique customer catalogs and pricing information
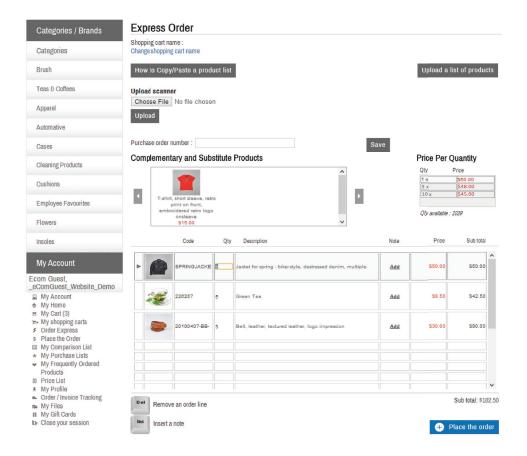

Create individual customer profiles for each user. These profiles can contain shipping addresses, specific price lists, unlimited user specific catalogs, purchase lists, shopping and payment options along with their sales tax rates.

Multilevel order approval

Define how orders from your web store are approved in various stages prior to fulfillment. This allows your business to track online orders in more detail throughout the entire ordering process and helps with budget management.

Speedup the ordering process

As a business owner, you know that time is of the essence. Help your customers save time while making purchases from your web store with tools like:

- Frequently ordered products
- Scheduled recurring orders
- The ability to simultaneously manage multiple shopping carts

Express Order

Expedite the ordering process with express order. Customers can search, paste or upload product numbers and quantities into a form and then add to cart. Once all items have been verified, an order can be placed.

Other features

- Advanced pricing
- Bank transfer (ACH, EFT)
- Credit card payment
- Cloud API
- Complementary product
- Digital goods

- Filers/power search
- Gift cards
- Linked attributes
- Live chat
- Multilanguage, multicurrency
- Punchout integration

- Real-time order tracking
- Returns management
- Responsive web design
- Sales tax & shipping integrations
- Single Sign-On (SSO)

Cloud or On Premise

Choose the k-eCommerce cloud to host your B2B web store to get up and running quickly and easily with little cost upfront. When you choose the cloud, we handle all IT so you can focus on your core business.

Our solution can also be hosted on your own server, if you prefer. This gives you full control of your eCommerce installation. We will still provide IT resources to help you customize your solution so it can best meet your unique business needs.

About k-eCommerce

k-eCommerce is dedicated to developing integrated eCommerce and ePayment solutions for Microsoft Dynamics® users. We develop fully integrated B2B, B2C, Sales Portal and mobile-optimized eCommerce websites. Our solutions are quick and easy to deploy on premise or in the cloud. k-eCommerce also provides secure PA-DSS certified credit card/ACH processing and an online bill pay portal.

We are a Microsoft Gold Certified Partner with Gold Web Development, Silver Application Development and Silver ERP competencies. Founded in 2001, k-eCommerce has offices in Detroit and Montreal.
