Highlights of ActivReporter

- Excel-based, user-friendly – minimal learning curve and quick implementation
- Brings over all of your Management Reporter row definitions and dimension sets within minutes into ActivReporter and makes them dynamic Excel reports
- Excel ribbon add-in includes over 50 financial functions that are linked to your Dynamics GP data allowing live data, responsive report building
- Combined Financial Reporting and Data Analysis tool
- Real-time accounting – the data you see is always live from Dynamics GP
- Direct connection to Microsoft's PowerBI
- Drillback into Journal Entry Inquiry in Dynamics GP from within ActivReporter AND your Excel reports
- Detailed, user-based security features that can be company specific
- FAST – renders over 200,000 entries per second saving ample amounts of time and allowing you to filter, re-filter, run reports and re-run reports as often as needed
- Multi-company reporting and data analysis. Connect to multiple companies at once.
- Low cost: \$1,000 installation fee with a \$70/mth license fee that includes access to all future releases and upgrades

Deeper Insights of ActivReporter

- Access to multiple calendars with the ability to create your own and therefore untethered to GP's periods
- Create your own filters using SQL script for data analysis
- Build your own financial reports in Excel and save as a template for future use
- View a Trial Balance right in ActivReporter with the ability to filter, view by month and more
- One-Step Financials before year is closed
- Include Unposted entries in your analysis and reports
- Able to publish reports without showing formulas, but still allowing drill down and drill back to Dynamics GP
- Has been used by nQativ clients for over 15 years – only the connection to GP is new
